FORT iT
SECURE DIGITAL BUSINESS

# Risk-based security management: Protecting what matters

In today's **fast-changing** world of cyber risks, it's hard to know what you really need to protect. FortIT's **risk-based security management** approach helps you clearly **identify** and **prioritize risks** to effectively **secure** your **most important assets** and **minimize your overall cyber risk exposure**.

We help you determine and implement **protective measures** for **effective** and **cost-efficient** protection of your **crown jewels**

Your benefits

- **Know your risks:** Systematically identify and assess threats unique to your business

- **Know your crown jewels:** Understand your business drivers to safeguard your key assets

- **Aligned strategy:** Clearly defined cyber strategy that aligns business and security goals

- **Lean approach:** Cost-effective security management based on leading practice standards

- **Proven expertise**: In-depth security expertise and diverse industry experience

Proactive, precise, protected: Embracing risk-based security

Why you need a risk-based security management approach

Increase board-level confidence in security

- Enhance board and management trust in security strategies
- Prioritize significant risks to ensure optimal resource allocation
- Foster a proactive approach to security

Stay ahead of regulatory demands

- Navigate complex regulations with clarity and purpose
- Reduce exposure to financial penalties and legal consequences
- Ensure ongoing compliance by adapting to evolving regulatory landscapes

Safeguard your reputation and operations

- Be prepared to face relevant cyber threats
- Ensure business continuity and resilience
- Protect brand image through enhanced security posture

Boost market trust through security certification

- Implement a proactive risk-based approach as a differentiator
- Meet industry standards such as ISO 27001 and build customer confidence
- Streamline the process for security certifications

Our expertise and experience help you succeed

✓ Core competence in cyber security and risk management, practical experience in CISO roles

✓ Proven methodology through many years of successful strategic project implementation

✓ Cross-industry expertise in regulatory requirements and their implementation
