

Security assessment: Evaluating your defenses

In today's **evolving cyber threat landscape**, finding out **how secure** your organization really is can be challenging. **FortIT's security assessment** takes a close look at your environment, finds areas that need attention, and **guides you to better protect your most valuable assets** from potential threats.

We evaluate your environment to **pinpoint vulnerabilities** and guide you in **protecting your most important digital assets**.

Your benefits

- **Unbiased external perspective:** A fresh, objective and impartial analysis to uncover potential blind spots in your security
- **Up-to-date expertise:** Access to the latest security threats and best practices through specialized knowledge
- **Strategic risk management:** Actionable insights ensure security measures align with your business goals for optimal protection
- **Compliance assurance:** Ensure adherence to industry standards, boosting trust and avoiding penalties

Uncover the true severity of your risks with a comprehensive security assessment

Uncover your blind spots and fix security vulnerabilities

FortIT's services for your added value

Cyber security review: Holistic assessment of cyber risk exposure and security posture: governance, threat modelling, risk analysis, maturity assessment and improvement roadmap

Your added value: Prioritized action plan to strengthen security posture based on the impact to your organization

Security architecture review: Detailed review of enterprise infrastructure or a specific product, technology or service implementation

Your added value: Improve product resilience, ensure security effectiveness and a reliable implementation

Compliance & Control Assessments: Analysis of current security measures against legal and regulatory requirements, leading practice standards and frameworks

Your added value: Streamlined compliance efforts and a roadmap for ongoing security improvements

Vulnerability Assessments: Real-life scenario testing through automated vulnerability scans, pentests, security and configuration reviews

Your added value: Identify and remediate vulnerabilities before they can be exploited by attackers

Tailored services: Bespoke services adapted to the unique requirements of your organization ensure your security needs are comprehensively addressed.
